CAREER OBJECTIVE

To develop a career in Project Management by applying my technical background and project coordination capabilities to plan, execute, and deliver projects effectively. Currently preparing for the CAPM certification, with a long-term objective of attaining PMP certification and progressing toward project management leadership through increasing responsibility in project delivery, stakeholder management, and organizational performance.

CAREER SUMMARY

Project Management focused professional and Computer Science graduate with experience supporting project planning, execution, and delivery across cross-functional teams. Skilled in requirements analysis, task prioritization, milestone tracking, stakeholder coordination, risk and issue management, and Agile project practices. Strong ability to translate business requirements into actionable project activities, coordinate technical teams, monitor deliverables, and maintain alignment with project objectives and timelines. Combines technical acumen with structured problem-solving, leadership, communication, and organizational skills to drive efficient project execution and high-quality outcomes.

KEY COMPETENCIES

- Django / Django REST Framework
- REST API Design and Integration
- Python and JavaScript
- React / Next.js
- Technical Project Management (TPM)
- Project Planning and Coordination
- Agile / Scrum / SDLC
- Sprint Planning and Task Management
- Risk and Issue Management
- Stakeholder Communication
- Requirements Analysis
- Team Collaboration and Leadership
- PostgreSQL / MySQL / SQL
- Git, GitHub Actions and Postman
- Docker Fundamentals
- Aspiring CAPM Certified Professional

PROFESSIONAL EXPERIENCE

Miicon Solutions Ltd. – Hybrid Sep 2025 – Present
Project Manager

- Coordinate project planning and delivery for **Bikroy Plus**, **Protocol People**, and the **Miicon Solutions platform**.
- Translate requirements into actionable tasks, prioritize work in **ClickUp**, and track progress, dependencies, and blockers.
- Collaborate with frontend and backend developers to align implementation with project requirements and delivery priorities.
- Coordinate testing, bug tracking, and feature verification; maintain documentation and communicate project updates to stakeholders.
- Contribute technical expertise in Python, Django, and REST APIs to support implementation discussions and problem-solving.

Exoveon – Part-Time Sep 2025 – Mar 2026
Software Developer

- Independently built the **ShodaiCart** frontend using Django Templates and Tailwind CSS.
- Developed responsive, reusable UI components for consistent experiences across devices.
- Contributed to **Zenorin** using Next.js and Tailwind CSS, collaborating on frontend and backend integration.

EDUCATION

Bachelor of Science in Computer Science and Engineering Jan 2022 – Dec 2025
Northern University Bangladesh
GPA: 3.80/4.00

Higher Secondary Certificate (HSC) 2020
GPA: 5.00/5.00

Secondary School Certificate (SSC) 2018
GPA: 5.00/5.00

SELECTED PROJECTS

Bikroy Plus – POS & Inventory Management Live Link

- Contributed to a business platform covering inventory, sales, customer and supplier management, and reporting.
- Supported project planning, requirements clarification, task tracking, and feature verification across frontend and backend work.
- Developed REST APIs, dashboard summaries, and Excel import/export workflows using Django REST Framework.

Miicon Solutions Website Live Link

- Delivered backend functionality supporting company content, recruitment, contact management, staff dashboards, and employee verification.
- Coordinated implementation tasks, tracked issues, and supported testing to align features with project requirements.
- Developed secure recruitment and assessment workflows, authentication, access controls, and production deployment.

Shodai Cart – E-commerce Platform Live Link

- Independently developed the complete frontend using Django Templates, HTML, CSS, JavaScript, and Tailwind CSS.
- Created responsive interfaces and reusable components to support a consistent shopping experience across devices.

Protocol – Employee Management Platform Live Link

- Developed notification workflows for attendance reminders, leave updates, and company announcements.
- Integrated Firebase Cloud Messaging, Celery, and Redis for scheduled delivery, device-token management, and notification preferences.

NUB ITSupport – Issue Reporting Platform GitHub Link

- Developed a centralized platform for students, teachers, and staff to report and track university lab issues.
- Built Django REST APIs supporting issue submission, management, and status tracking.
